- Management of various technologies such as Javascript, React, Node.js, MongoDB.
- Writing clean and functional codes.
- Web design.
- Attention to detail.
- Teamwork.
- Conflict resolution
- .Assertive communication
- Time management
- Let me know if you need any further assistance

LANGUAGES

- Spanish (NATIVE)
- English (ELEMENTARY)

EXPERIENCE

I participated as a trainee in a web development program where I acquired knowledge in technologies such as Javascript, Node.js, and MongoDB, allowing users to interact with a dynamic system. This experience enabled me to gain skills in web development and creating interactive sites.

I collaborated on practical projects, creating a server-side application using Node.js and Express to support real-time communication between the client and the server. This allowed me to apply newly acquired skills, demonstrate my ability to learn quickly, and adapt to a team working environment.

FullStack development of new features on both sides of the marketplace and integration of payment APIs, with the implementation of a shopping cart and user registration

EDUCATION

Bootcamp FullStack Developer - CoderHouse

I completed an intensive full-stack development bootcamp where I acquired knowledge in Javascript, React, Node.js, MongoDB, and Express.
I developed several practical projects to apply what I learned during the bootcamp.
I attended web development meetups to learn new technologies and establish connections in the industry
